

AMEUBLEMENT

# NF AMEUBLEMENT

## THE GUARANTEE OF PURCHASING A CERTIFIED QUALITY FURNITURE

Because your clients care about the quality of products in their daily life, there's one solution: NF Ameublement !

### THE BRAND GUARANTEES OF NF AMEUBLEMENT

- Purchase reliable, solid, durable, safe furniture, above and beyond regulatory requirements
- Purchase confidently, with complete transparency and total trust in furniture evaluated by an independant technical organisation: the **Technological Institute FCBA**
- Purchase furniture which is fit for use and tested according to French and European standards, under the hardest conditions of everyday use

The brand NF Ameublement (which is more than 60 years old) enjoys a good reputation among the public, and a positive image thanks to the fact that it is recognized by 85% of the consumers as a symbol of safety and quality. Today, it includes around 30 manufacturers who produce certified products

### IT DEALS WITH DOMESTIC FURNITURE UNITS

- Kitchen and bathroom fittings
- Seats (dining chairs, easy chairs, settees, recliners, sofa-beds...)
- Pieces of furniture for children, bedroom, sitting room, lounge (tables, beds, storage...)

### THE CERTIFIED QUALITIES OF NF AMEUBLEMENT PRODUCTS

- Safety
- Durability
- Build Quality
- Conception

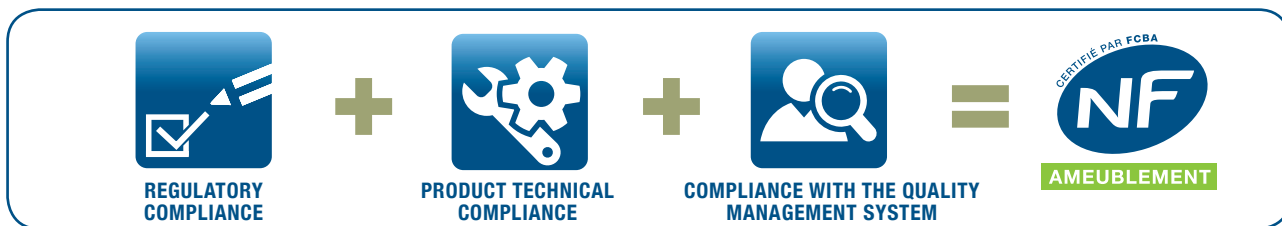

### ALL REQUIREMENTS HAVE BEEN QUANTIFIED AND VERIFIED

You can find them in the **NF Ameublement** specifications, available at [www.meuble-qualité-certifié.fr](http://www.meuble-qualité-certifié.fr)

These standards were created in partnership with consumers associations, users, distributors, manufacturers, laboratories and public bodies

For all the certified furniture units, regular tests and audits had been conducted by FCBA in order to ensure their conformity to standards:

Test examples on a certified furniture unit:

## SOLIDITY

**Storage furnishing overload test:**

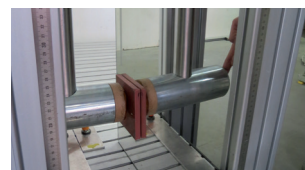

Simulation of a kitchen shelf being overloaded with piles of plates and cups

## SAFETY

**Test of glass impact from below:**

Simulation of the head of a child colliding with the glass from below.

## DURABILITY

**Test of polymer door seal at 70°C:**

Simulation of a door located near a hot oven.

**Chair armrest test:**

Simulation of a person standing up and leaning on the armrests.

### GOOD TO KNOW !

**Certification is a voluntary procedure for the furniture manufacturers:**

They are committed to manufacturing identical lines of furniture which are conformed to the brand standards.

A NF certified piece of furniture is guaranteed to be conform to the standards currently in place, as the brand is backed by the Technological Institute FCBA.

The NF logo is a symbol of quality, security and reliability for the consumer: "The claims are proven".

All certified furniture units can be recognized by a stamp (located on the inside of a door, under the seat of a chair, under a table top... depending on the furniture).

- An updated list of holders is available at [www.meuble-qualite-certifie.fr](http://www.meuble-qualite-certifie.fr)
- A list of certified products by manufacturer is available on request.
